

CalDigit 10GbE Controller Windows11 x64 24H2 Driver Installation

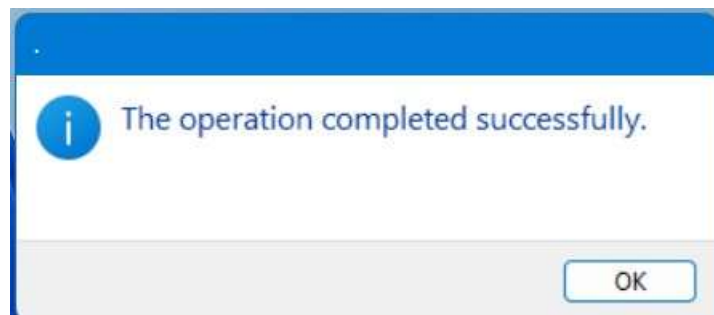

Notes: It is **mandatory** to use driver version 3.2.1.0 or above to ensure best compatibility with Thunderbolt and USB4 technologies as well as the best user experience.

To install the driver, simply follow the steps below:

1. Connect CalDigit devices that has 10Gb Ethernet controller on it, such as TS5 Plus or Connect-10G adapter, to your Windows 11 machine.
2. In this folder, right click on **"aqnic650.inf"** file, which is "Setup Information" file and choose **"Install"**.

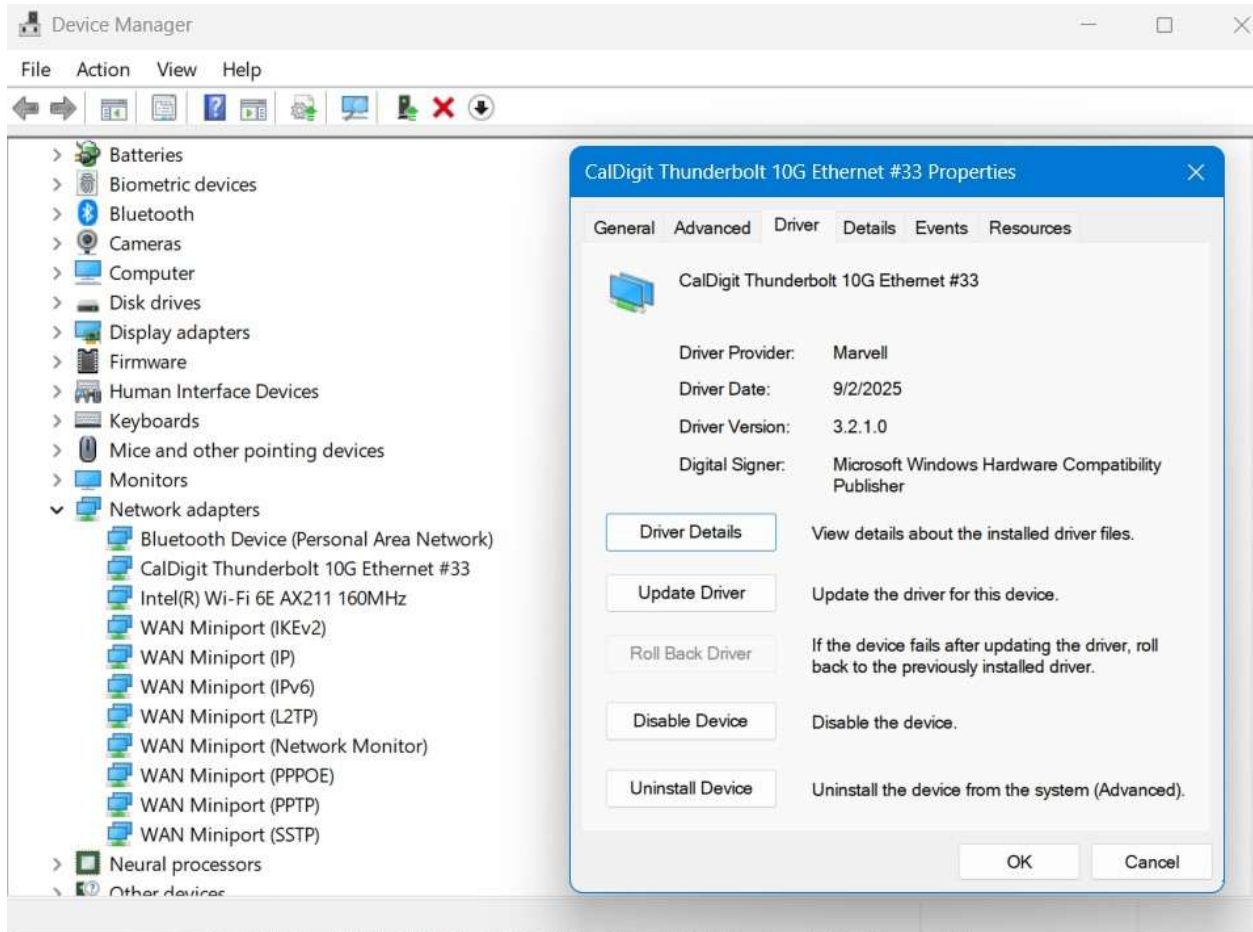

3. Follow the instructions on the screen to finish the driver installation. You will see a window saying "The operation completed successfully"

4. To verify if the driver is installed successfully and attached to CalDigit 10GbE controller, you can open “Device Manager”, navigate to “Network adapters” and double click on “CalDigit Thunderbolt 10G Ethernet” , then choose “Driver” tab.

The driver date should show 09/02/2025 and driver version is 3.2.1.0.

Please contact Support@CalDigit.com if you have any questions.
